# **SPECIFICATIONS**

### 1. Application

- 1) This document is applicable to the crystal unit FA2016AA that are delivered. to from Seiko Epson Corp.
- 2) This product is compliant with RoHS Directive.
- 3) This Product supplied (and any technical information furnished, if any) by Seiko Epson Corporation shall not be used for the development and manufacture of weapon of mass destruction or for other military purposes. Making available such products and technology to any third party who may use such products or technologies for the said purposes are also prohibited.
- 4) This product listed here is designed as components or parts for electronics equipment in general consumer use. We do not expect that any of these products would be incorporated or otherwise used as a component or part for the equipment, which requires an extra high reliability, such as satellite, rocket and other space systems, and medical equipment, the functional purpose of which is to keep life.
- 5) This FA2016AA is authorized for Wireless Battery Management System for automobile only.
- 6) This product conforms to automotive part standard " AEC-Q200 ".

### 2. Product No. / Model

# X1E000381A11600 / FA2016AA

### Packing

It is subject to the packing standard of Seiko Epson Corp.

### 4. Warranty

Defective parts which originate with us are replaced free of charge in the case of defects being found with 12 months after delivery.

#### 5. Amendment and/or termination

Amendment and/or termination of this specification is subject to the agreement between the two parties.

### [7] Notes

- 1. Max three (3) times re-flow is allowed. Its recommended to manually solder when not enough/no solder detected. (Using soldering iron at +350 °C × within 5 seconds)
- 2. Patterning on a board should follow our company recommended pattern.
- 3. Applying excessive excitation force to the crystal unit may cause deterioration damage.
- 4. Start up time of oscillation may be increased or no oscillation may occur unless adequate negative resistance is allocated in the oscillation circuit In order to avoid this, please provide enough negative resistance to the circuit design.

How to check the negative resistance

- Connect the resister(R) to the circuit in series with the crystal unit.
- (2) Adjust R so that oscillation can start (or stop).
- (3) Measure R when oscillation just start (or stop) in above (2).
- (4) Get the negative resistance -R=R+CI value.
- (5) Recommended -R [-R]>CI × 10
- 5. It is recommended to do patterning to the oscillator as short as possible. Abnormal oscillation may happened if the line is too long.
- 6. To avoid malfunction, no pattern across or near the crystal unit is allowed.
- 7. Few data or readings taken at user side may be different from our company's data. Confirmation of the different value is necessary before application.
- 8. Too much exciting shock or vibration may cause deterioration on damage.

  The product may damage depends on the condition such as a shock in assembly machinery.

  Please check your process condition in advance to minimize and maintain the shock level.
- 9. This product may be affected to ultrasonic cleaning. It is depends on the cleaning conditions (Cleaning machine type/power/time/content/position etc.). The warranty will not cover any damage due to this type of usage. Check conditions prior to use.

6

- 10. Condensation may occur when used/stored under high humidity condition. Please take precautions to prevent condensation.
- 11. Please refer to packing specification for the storage method and packing standard.

# [4] Quantity 収納数量

• 3 000 pcs./reel (Standard)

However it is not the limit, in case that the order quantity does not fill with 3000 pieces. Packing quantity is defined by 14th and 15th digit of product number.

但し、注文数量が3000 pcs に満たない場合は、その限りではない。

収納数量は、製品型番の14桁、15桁による。

14th and 15th digit of product number. 製品型番の 14 桁、15 桁	Quantity
00	3 000 pcs
01	Vinyl Bag(Bulk)
11	Any Quantity
12	250 pcs
14	1 000 pcs
18	5 000 pcs

# [5] Storage environment 保管環境

(1) Before open the packing, we recommend to keep less than +30 °C and 85 %RH of Humidity, and to use it less than 6 months after delivery.

開梱前の製品は、温度 +30 °C、湿度 85 %RH 以下での保管をして下さい。 貴社納入後、袋未開封で6ヶ月以内の実装を推奨します。

(2) We recommend to open Package in immediately before use. After open Package, We recommend to keeps less than 6 month. No need dry air before soldering work if it is less than temperature +30 °C, 85 humidity %RH.

使用直前まで開梱せず、袋開封後は6ヶ月以内の実装を推奨します。 温度 +30°C、湿度 85%RH以下では、はんだ付け作業前に乾燥不要です。

- (3) Not to storage with some erosive chemicals.
  - 化学薬品類との同居を避ける。

(4) Nothing is allowed to put on the reel or carton to prevent mechanical damage 外装箱がゆがまないようまた、外圧がかからないように保管して下さい。

# [6] Handling リール取扱い

To handle with care to prevent the damage of tape, reel and products.

リールの取扱いについては、中のテープ・製品を変形させないようにして下さい。
